

THE BRAIN-MIND MAGAZINE

<http://www.brain-mind-magazine.org/>

The Brain-Mind Magazine (BMM) is published by the Brain-Mind Institute (BMI). It publishes public oriented articles on inner working of single brains and ways multiple brains work together. The term brain here includes natural and artificial ones. The types of articles include, but not limited to, news, reports, series, comments, debates, topic reviews, book reviews, tutorials, history, and editorials.

Copyrights

By submitting a work to BMM for review, all the authors agree: (1) The work is not concurrently being considered by another publisher and will not during the BMM review period. (2) If the submission is accepted, the copyright of the work is automatically transferred to BMM for quick publication. (3) You do not make any personal copy of the full paper (other than the title and the abstract) publicly available elsewhere during BMM review and after BMM acceptance so that the BMM site can collect accurate reading statistics for your potential loyalty. Only the title, author name, and the abstract of a BMM published article can duplicated at another web site (or publication media), but such a site should provide clearly visible link to the corresponding article at the BMM site. The readers of BMM vote whether an article is worth reading. A dynamic popularity parameter n is automatically maintained by the BMM system. All articles before reaching n are free to read, but each reader must agree to vote. It becomes a popular article when it researches n . Popular articles are charged US\$1.33 each, where \$0.33 is the credit card charge per transaction and \$1 is the article income. The 50% of the income from each popular article goes to the author as loyalty. The remaining 50% of the income goes to the BMM as reinvestment. The BMM reserves the rights for interpretation and change of its policies. Cover graphics: Juyang Weng, courtesy of http://rsm1433.blogspot.com/2013/02/blog-post_5650.html.
